

OBJECTIVE

Full-Stack Developer with hands-on experience building web applications using React.js, Node.js, JavaScript, Python, Flask, REST APIs, MongoDB, and MySQL. Experienced in developing responsive frontend interfaces, backend application components, API integrations, JWT-based authentication. Seeking a Full-Stack Developer role to build scalable, reliable, and user-focused web applications.

EDUCATION

Master of Computer Applications (MCA)

SRM Valliammai Engineering College | 2024 – 2026 | CGPA: 8.24 | Kattankulathur | Tamil Nadu

Bachelor of Computer Applications (BCA)

Lakshmi Bangaru Arts & Science College | 2021 – 2024 | Percentage: 80% | Melmaruvathur | Tamil nadu

HSC – 79.9% (2021)

Adhiparasakthi Matriculation Higher Secondary School | Melmaruvathur | Tamil nadu

SSLC – 72.2% (2019)

Adhiparasakthi Matriculation Higher Secondary School | Melmaruvathur | Tamil nadu

TECHNICAL SKILLS

- Languages: Python, Java, JavaScript
- Frontend: React.js, HTML5, CSS3, Tailwind CSS
- Backend: Node.js, Flask, REST APIs, Express.js
- Databases: MySQL, MongoDB
- Tools: Git, VS Code, Power BI, MS Excel
- Operating System: Linux

STRENGTH

- Quick learner with adaptability to new technologies
- Problem Solving & Logical Thinking
- Team Collaboration

CERTIFICATIONS

- Full Stack Web Development – NoviTech
- Java – IIT Bombay
- Microsoft Advanced Excel
- Introduction to Machine Learning – Microsoft
- Prompt Engineering – Infosys Springboard

PUBLICATIONS

Published 2 research papers in IJIRT (International Journal of Innovative Research in Technology) on:

- Fake/Real News Identification using Real-Time API Fetching System
- AI-Enabled Smart Service Booking and Technician Management System

PROFESSIONAL EXPERIENCE

INTERNSHIP

Vei Technology | Chennai | 2022

- Developed Python-based web application components during internship training.
- Contributed to frontend and backend development by implementing web application components and interactive user interfaces.

Retech. | Chennai | 2023

- Analyzed datasets using machine learning techniques to identify patterns and support predictive solutions.
- Implemented machine learning algorithms for data analysis and experimentation.
- Collaborated with team members to evaluate model outputs and improve solution effectiveness.

PROJECT

AI- Enabled Smart Service Booking and Technician Management System

(MERN Stack | Rest API | JWT | socket.io | Tailwind CSS) [Live Demo](#)

- Engineered a MERN-based service management platform integrating authentication, service booking, technician assignment, and service tracking.
- Implemented JWT-based authentication and role-based access for customers, technicians, and administrators.
- Integrated REST APIs to support frontend-backend application communication.

[GitHub](#)

E Commerce Web Application

[Live Demo](#)

(React.js | Node.js | JavaScript | MySQL | JWT)

- Developed a responsive e-commerce web application with product listings, search functionality, shopping cart management, and checkout-oriented user interface.
- Built shopping cart management and checkout-oriented user interface components.
- Integrated JWT-based authentication for secure user access.

[GitHub](#)

Fake/real News Headlines identification using realtime API fetching system

(Python | Flask | NLP | HTML | CSS)

[Live Demo](#)

- Developed a real-time news classification application using Python, Flask, NLP, and machine learning.
- Integrated multiple news APIs to collect and process live news data.
- Implemented text preprocessing and TF-IDF-based feature extraction for news classification.
