

OBJECTIVE

Aspiring Software Developer skilled in Python, Java, and MySQL, with a strong interest in developing scalable applications. Seeking an opportunity to apply technical knowledge, contribute to real-world projects, and grow as a developer.

EDUCATION

Master of Computer Applications (MCA)

SRM Valliammai Engineering College | 2024 – 2026 | CGPA: 8.24

Bachelor of Computer Applications (BCA)

Lakshmi Bangaru Arts & Science College | 2021 – 2024 | Percentage: 80%

Adhiparasakthi Matriculation Higher Secondary School

HSC – 79.9% (2021)

SSLC – 72.2% (2019)

TECHNICAL SKILLS

- Programming Languages: Python, Java, JavaScript
- Web Technologies: HTML5, CSS
- Databases: MySQL, MongoDB
- Tools & Platforms: Git, VS Code
- Operating Systems: Linux

LANGUAGES

- TAMIL
- ENGLISH

STRENGTH

- Self-confidence
- Problem solving
- Team-work & coordination

CERTIFICATIONS & ARCHIEVEMENTS

Published 2 research papers in IJIRT (International Journal of Innovative Research in Technology) on:

- Fake/Real News Identification using Real-Time API Fetching System
- AI-Enabled Smart Service Booking and Technician Management System

PROFESSIONAL EXPERIENCE

INTERNSHIP

Vei Technology | 2022

- Completed a dynamic internship at VEI Technology, specializing in Python for web application development.
- Contributed to the creation of interactive and user-friendly interfaces, demonstrating proficiency in front-end and back-end technologies. .

Retech. | 2023

- Interned at Retech Solution Pvt. Ltd., gaining hands-on experience in machine learning.
- Applied algorithms to analyze and interpret data, contributing to the development of innovative solutions.
- Collaborated with cross-functional teams to implement machine learning models, showcasing adaptability and teamwork. .

PROJECT

E Commerce web site.

- Developed a full-stack e-commerce web application for browsing products, managing carts, and placing orders.
- Built the frontend using HTML, CSS, and JavaScript, and implemented backend functionality using Node.js/Flask with database integration (MySQL) for product and user data management.

Fake/real news identification using realtime API fetching system

- Developed a web application to classify news headlines as real or fake using real-time data.
- Integrated multiple news APIs to fetch live data and applied machine learning/NLP techniques to analyze and classify news content with a confidence score.

AI- Enabled Smart Service Booking and Technician Management System

- Developed an AI-enabled web application for booking services and managing technician assignments.
- Improved efficiency of service allocation, reduced manual effort, and enhanced user experience through faster and more accurate technician assignment.

DECLARATION

I hereby declare that all the details mentioned above are accurate and true to the best of my knowledge, and I take full responsibility for their authenticity.
